Price list Great Britain

Introduction

The e-Charge rates are governed by the maximum charging speed, for which a fast charging speed usually also implies higher costs.

e-Charge differentiates the following charging speeds:

Charging:	AC charging stations up to a max. of 22 kW capacity (AC – alternating current)
	DC charging stations up to a max. of 50 kW capacity (DC – direct current)
Ionity:	HPC charging stations up to a max. of 150 kW capacity (HPC – high-power charging)

Charging stations, which are provided for free by a charging infrastructure operator, are basically also made available to e-Charge customers free of charge. You can conveniently filter for free charging stations on our map.

Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event.

All prices are individually based on charge point operators. A variable tariff applies with regard to the individual charging process. The prices depend on respective charge point operators. Please inform yourself about the valid prices in the e-Charge app before you start charging. For charging abroad (= e-roaming), you will always pay the local sales rate without any additional fees.

e-Charge

Tariff for Great Britain

Prices from 01.07.2020 to 31.12.2020

Due to a reduction in German value added tax from 01.07.2020 to 31.12.2020, tariffs will be adjusted as follows:

Minimum contract period ¹	12 months
Monthly base fee	4,34 GBP / month

The rates that apply to an individual charging event at the respective charging station can be found in the e-Charge app and are subject to change. Please familiarise yourself with the applicable rates before commencing the charging event.

Variable service fees for ²	e-Charge
---	-----------------

AC charging
(\leq 22kW)

DC charging
(\leq 50kW)

HPC charging
(\leq 150kW)

Prices may vary depending on the operator of the charging station. Please check the valid prices in the e-Charge app before you start charging.

¹ The minimum contract period is 12 months. The contract may be terminated by both parties with a notice period of two weeks to the end of the respective contract period. If the contract is not terminated on time, the contract period is extended by a further 12 months period.

² All prices are individually based on charge point operators. To view respective conditions, please refer to the charge point details in the e-Charge app.

e-Charge

provided by Digital Charging Solutions GmbH

Commercial
Vehicles

Charging event transaction

The invoicing of varying fees for charging is based on the appropriate tariff per minute (per commenced minute), per kWh or per charging event. The charging event starts if the vehicle is connected to the charging station and ends when it is disconnected. You can also recharge for free using the e-Charge service at free charging stations.

Charging abroad

The applicable local charging rates can be also found in the e-Charge. When using international roaming, you will receive a separate invoice for each country.

Valid from 01/09/2019, all rates incl. VAT, subject to changes and errors.

Digital Charging Solutions GmbH, Brunnenstraße 19-21, D-10119 Berlin.

e-Charge

Tariff for Great Britain

Prices until 30.06.2020 as well as from 01.01.2021
